<b>7. Problem</b>				
2.2.4.2.6 talks about the System Message Viewer. Is this a generic Viewer that applications can also use for messages? If so, a filter capability would be nice so you could bring up multiple message windows that only displayed certain messages. For instance, based on subsystems with an applicaiton system.				
<b>8. Recommendation</b>				
See problem description above.

## Response Attachment 200-274

The following requirement has been added to section 2.2.4.2.

The System Message Viewer shall provide the capability to filter messages as requested by the user.
